

In 1974, ready to start his own practice, Dr. Robert Esplin returned to his home town to start Sylvania Veterinary Hospital. From the beginning his plan was to offer a special brand of veterinary care that included a 100% commitment to be there for his clients and patients. The modern, 16,000 square foot SylvaniaVET is the culmination of this commitment. We are bigger now but our commitment to quality, compassion, thorough patient care, and customer service remains the same more than 35 years later.

In 1978, SylvaniaVET became an inspected and certified member of the American Animal Hospital Association. Regular inspections by AAHA confirmed that our hospital met or exceeded the highest standards of the profession.

SylvaniaVET is not the average neighborhood practice, but a pet care destination. Our goal is to provide all the services a pet owner might need for their pet. Our building was designed with the comfort and safety of our patients in mind. In addition to all standard veterinary services SylvaniaVET offers boarding, grooming, doggy day care, obedience classes, physical rehabilitation, hydrotherapy and therapeutic laser as well as a well stocked retail space and many more services too numerous to mention.

Our 24/7 commitment is unique to this region. No other general practice has staffing 'round the clock seven days a week which enables us to answer the phones whenever you call. No other general practice answers their phones 'round the clock. One of our highly trained technicians and an assistant is always in the building providing care to our patients and boarding guests. One of our doctors is always on call and will come in when necessary to provide emergency after hours care.

SylvaniaVET is a breeder friendly hospital, we are proud to be able to offer a variety of reproduction services. We are able to perform both traditional and surgical AI, semen collection at the time of breeding, and processing frozen semen to help clients build and continue their breeding program. Ultrasound guided pregnancy checks are available. SylvaniaVET is also available for scheduled and emergency C-sections. To assist clients in their endeavors to improve the quality of their breeds, SylvaniaVET offers kennel client discounts to breeders who own a minimum of six animals, as well as litter vaccine discounts.

Mission Statement

The mission of the Sylvania Veterinary Hospital is a commitment to superior care, education and service to our patients, clients and staff. We are our patients' healthcare advocate.
